Solid Wood Finishes

A Variety of Finish Colors From Which to Choose

This finish card displays the standard available finish colors offered on our pews, chairs, auditorium seating and platform furniture- except where noted. In addition to the colors shown, custom color match finishes are also available. Please contact your Sauder Worship Seating sales representative for complete details.

A Product of Nature's Infinite Variety

Trees are products of their environment. Subtle variations in their surroundings – the minerals in the soil, the amount of sunlight and rainfall – are reflected in the grains of trees from different sections of a forest and even from tree to tree.

The wood used in producing Sauder Worship Furniture is carefully selected for uniformity and color consistency. However, due to nature's wonderful diversity, no two grains will ever be exactly the same, nor will they accept stain in exactly the same manner. After all, subtle variations in grain are what provide natural woods with their unique warmth, texture, and beauty.

Industry Leading Offering of Standard Wood Species

Sauder Worship Seating extends to you the largest offering of standard wood species in the industry. We proudly offer flat/plain sawn Northern Red Oak, Northern White Oak, Hard Maple, Cherry, African Mahogany, Black Walnut, plus rift sawn Northern Red Oak and Northern White Oak. Beech is used in the production of our plybent chairs. Because of our extensive standard offering, you'll experience faster quote turn-around with no custom job charges.
