

DEFINITY[®]

**SAUDERWORSHIP**
seating[®]

furniture for the way you worship

Definity[®] seating is the best way to predictably maximize the seating capacity of a worship space. Designed to be exceptionally practical and comfortable, Definity makes optimum use of your seating space with individually defined seats, while still providing the sense of community only bench-style seating provides.

- Available on all pew body styles
- 16" Standard Depth
- 19", 20", 21" or 22" Seat Widths
- Each individual cushion is removable
- Seats can be numbered for concerts and events

People Won't Sit the Way You Think They Will

In the early planning stages of a new church or when replacing pews in an existing building, consider how many people you'll want to seat. How much space will each person take?

Building Code Requirements

Building code is the standard that architects and builders are required to use to determine seating capacity. It says to allow 18 inches of seating per person.

To put this into perspective, think about how much room you have in a coach seat on an airplane. Regulation seats actually give you 19 inches per person. That's pretty close to the person next to you!

We recommend 20 inches per person as the best guide for determining maximum seating capacity.
