

WORSHIP PEWS

furniture for the way you worship

BUILDING ON A LONG LEGACY

Quality and craftsmanship form the cornerstone of everything we do at Sauder Worship Seating®.

Established over 85 years ago by carpenter Erie Sauder, who found his calling building quality, solid wood furniture.

Mr. Sauder's first church furniture project, dating back to 1934, is still an integral part of the worship services of Bethlehem Lutheran Church in Defiance, Ohio.

To this day, the enduring beauty and stunning craftsmanship of these furnishings exemplify the standards he established and we have upheld for more than 8 decades.

Today, we continue Erie Sauder's legacy, by serving over 35,000 congregations throughout North America. We sincerely appreciate the opportunity to be part of your endeavor.

Sauder Worship Seating offers a variety of pew styles to meet the comfort and spirit of any worship space. From solid wood pews to fully upholstered, our pews feature contoured seats, ergonomically designed for maximum comfort. We also offer a wide variety of wood species and finish colors to meet your specific worship needs.

Shown here are the custom pews, millwork, and platform furniture serving the congregation of Bethlehem Lutheran Church.

Definity seating is the best way to predictably maximize the seating capacity of a worship space. Designed to be exceptionally practical and comfortable, Definity makes optimum use of your seating space with individually defined seats, while still providing the sense of community only bench-style seating provides.

- Available on all pew body styles
- 16" Standard Depth
- 19", 20", 21" or 22" Seat Widths
- Each individual cushion is removable
- Seats can be numbered for concerts and events

Christ Community Church
Laguna Hills, CA

Duet is a blend of modern ingenuity with traditional design. Based on the simple, quiet operation and unparalleled comfort of the Sauder Worship Seating® auditorium line, each seat quietly and consistently returns to the raised position.

Or Olam
New York, NY

Cushion Options

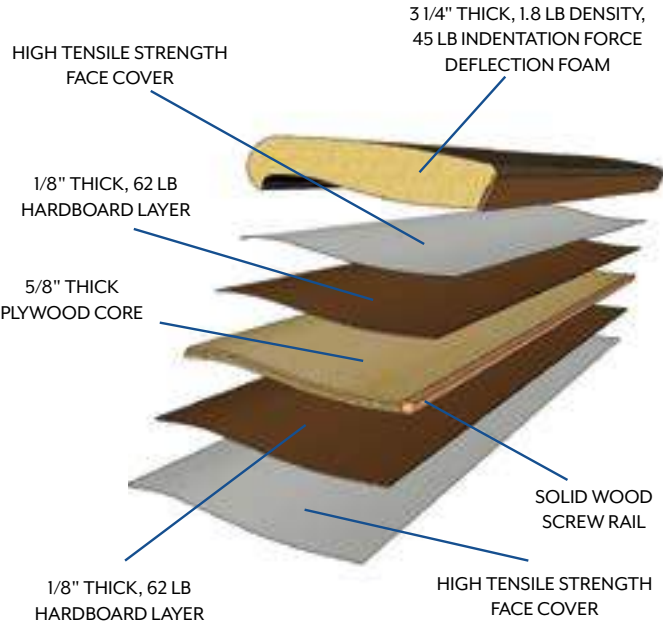

Comfort plays a critical role when making a decision related to seating. Sauder Worship Seating® offers several comfortable and durable foam options, providing lasting quality.

Choose from conventional or high resiliency (HR) foam. Too little density allows someone to bottom out, while too much can make for a stiff seating experience.

Seat Contour

At Sauder Worship Seating, every seat has a contour. This contour provides maximum seating comfort and strength over the life of the pew. In addition to the contoured seat, we offer a flat or contoured back. These pew options offer support and have an appealing appearance.

Upholstered Seat Construction

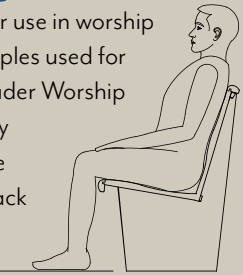

Our Lady Star of the Sea
Ponte Vedra Beach, FL

Ergonomic Design

All our seating products are designed for use in worship settings. Designs and engineering principles used for office and task chairs are applied to Sauder Worship Seating products. Our pews are uniquely designed to provide comfort through the combination of a contoured seat and back that uses appropriate foam.

STANDARD PEW ENDS

Pew End Edge Mold Profiles

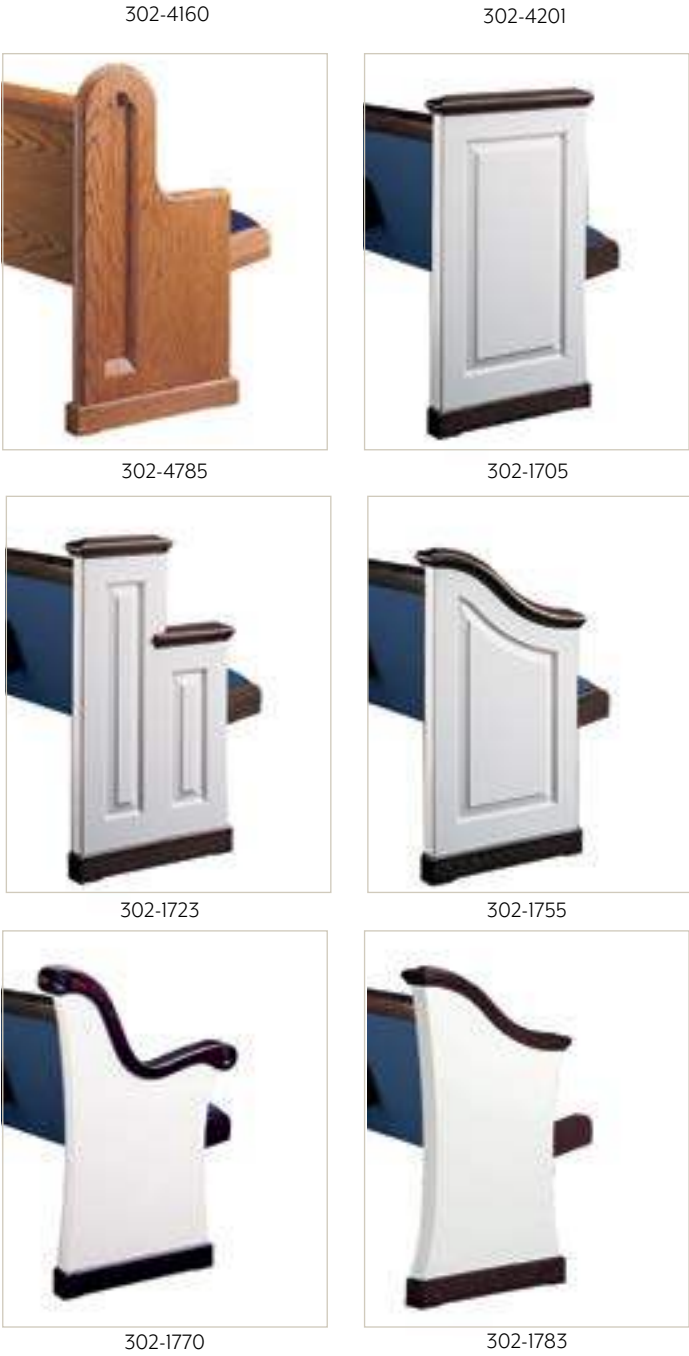

Sauder Worship Seating® offers 9 standard edge mold profiles, allowing the perfect finishing touch for any pew ends. Shaped with computer-controlled machinery, each end will be routed with consistent dimension and smoothness.

Pew ends are a prominent visual piece for any church. With a selection of more than 100+ standard solid wood pew ends and the flexibility to produce custom requests, Sauder Worship Seating can assist in creating a worship environment that serves you.

STANDARD PEW ENDS

Finishes and Wood Species Options

Sauder Worship Seating offers nine standard wood species, including Beech, Cherry, European Beech, Mahogany, Maple, Northern Red Oak, Northern White Oak, Rift Northern Red Oak, Rift Northern White Oak, and Walnut.

Each wood specie and finish color is available for every worship chair and pew that Sauder Worship Seating manufactures.

The wood specie will impact the color of the finish due to varying wood grains and natural tones of the wood. Please contact your local Sales Consultant today if you're interested in a sample or would like to create a custom finish color.

CUSTOM PEW ENDS

We offer full custom capabilities and look forward to working with you to customize this crucial visual element in your worship space.

St. Pius X
Granger, IN

CUSTOM PEW ENDS

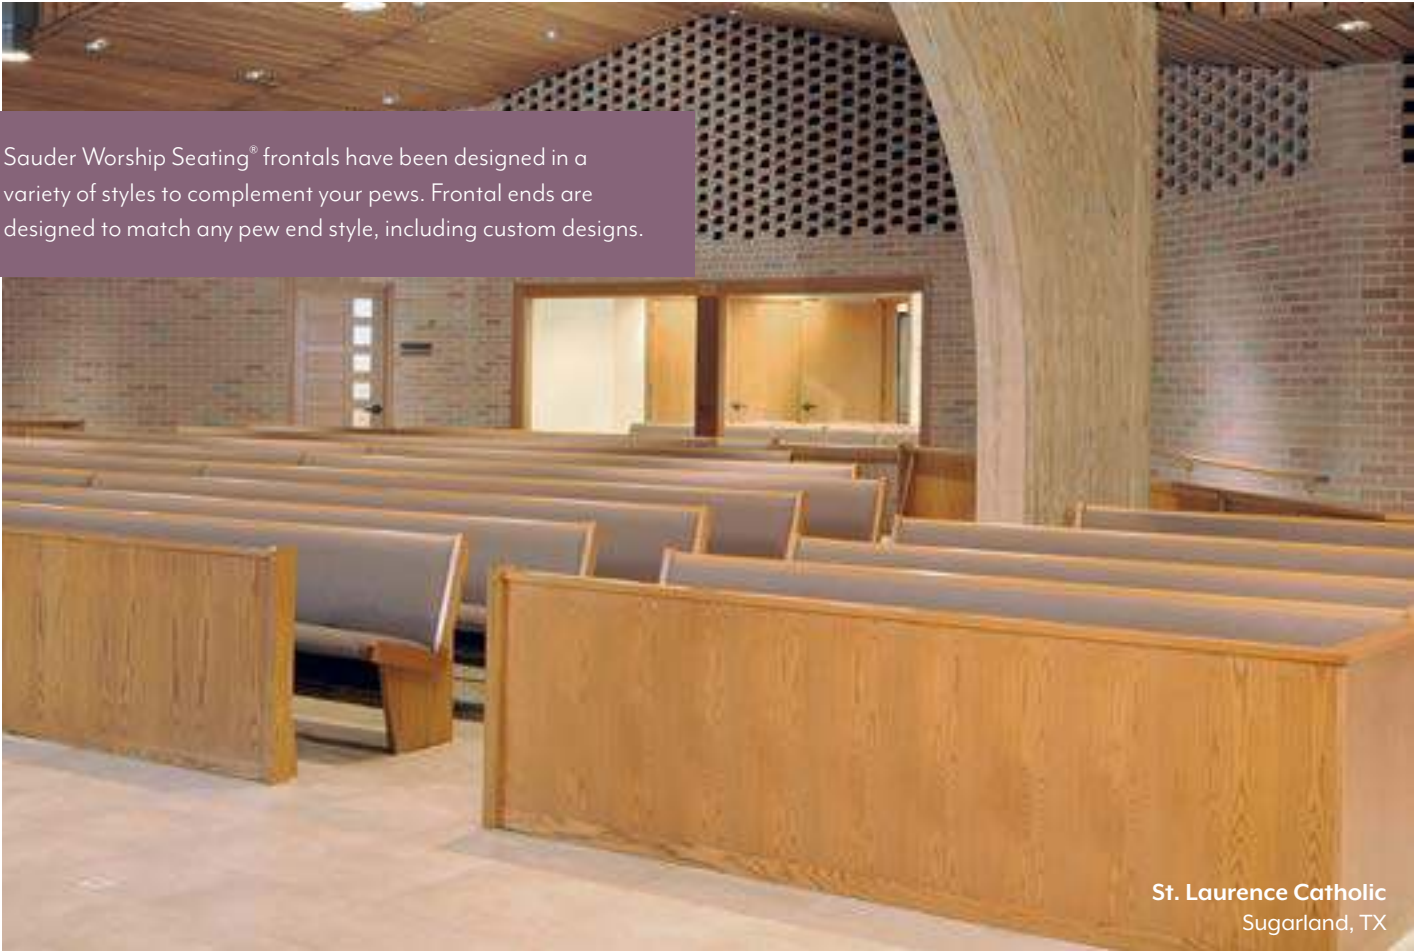

Personalize your pew end and create absolute uniformity by applying or engraving your denominational symbol or custom design.

Choose from our library of standard symbols or submit your own to add the perfect detail to your worship space.

FRONTALS

Sauder Worship Seating® frontals have been designed in a variety of styles to complement your pews. Frontal ends are designed to match any pew end style, including custom designs.

Also Available 2-Book Continuous
or Rear Opening

PEW SEATING SIZE

People Won't Sit the Way You Think They Will

In the early planning stages of a new church or when replacing pews in an existing building, consider how many people you'll want to seat. How much space will each person take?

Building Code Requirements

Building code is the standard that architects and builders are required to use to determine seating capacity. It says to allow 18 inches of seating per person.

To put this into perspective, think about how much room you have in a coach seat on an airplane. Regulation seats actually give you 19 inches per person. That's pretty close to the person next to you!

We recommend 20 inches per person as the best guide for determining maximum seating capacity.
