

RIFT NORTHERN RED OAK SOLID WOOD FINISHES Also available in Veneers

Simulating the natural variations in the color and grain of wood with a printing process will not produce an exact match to the finished product. This card is to be used as an indicator of color and grain. We recommend **any final selection be made after viewing physical samples** (color or material chips) in the lighting and environment in which the products will be used.

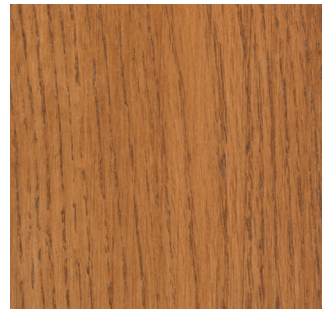

Sauder® Manufacturing Co. reviews and approves all color samples for accuracy under cool white fluorescent light. If you have questions about any aspect of our finish process, please ask your consultant for more information.

FINISHES

Choose From a Variety of Finish Colors

In addition to these standard colors shown, custom color matching is available. Please contact your Sauder Worship Seating® sales consultant for additional information.

A Product of Nature's Infinite Variety

Trees are products of their environment. Subtle variations in their surroundings, such as the minerals in the soil, the amount of sunlight and rainfall, are reflected in the grain.

The wood used to craft Sauder Worship furniture is carefully selected for uniformity and color consistency. Due to nature's wonderful diversity, no two grains will ever be exactly the same, nor will they accept stain in exactly the same manner. After all, variations in grain provide natural woods with their unique warmth, texture and beauty.

Sauder Worship Seating uses sustainable, domestic, managed forestry for our product, which also includes responsible resourcing during harvest months. We have capabilities of drying our wood in Archbold, Ohio.

Long Lasting Beauty

Sauder Worship Seating employs a 3-step finishing process that utilizes a 2-part polyurethane finish to ensure lasting beauty, and meet or exceed all applicable environmental requirements. The quality and durability of our finishes are reflected in a 25-year pew and 10-year chair warranty.

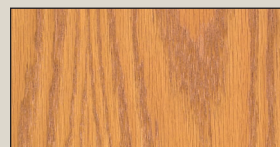

The Industries' Largest Offering of Wood Species

Sauder Worship Seating has the largest offering of standard wood species in the industry. We proudly offer flat/plain sawn Northern Red Oak, European Beech, Cherry, Hard Maple, Northern White Oak, Rift Northern Red Oak, Rift Northern White Oak, African Mahogany and Black Walnut.

Only Beech is used in the production of plybent chairs.
